

## DATASHEET

### MembrainPAS-PM

Mobile maintenance and service with SAP PM/SAP CS

MembrainPAS-PM enables mobile maintenance and guarantees highest productivity thanks to a paperless process, quicker response times and direct documentation into the leading ERP (such as SAP) system.

A certified interface brings relevant data from SAP PM/CS to your mobile device in a user-friendly and convenient way. With this powerful tool workers get prioritized notifications with enriched details to execute service jobs in minimum timeframe. While doing this, the App documents wor-

king time, spare parts as well as used materials. Further information such as historical information of a technical equipment and stock information about spare parts in the warehouse is available with only one click in the App.

The standardised SAP PM/CS interface enables the use of all SAP standard functions. Its flexibility offers customising as well as a multi-platform approach for smartphones and tablets (Android, iOS, BlackBerry OS, Win Phone etc.).

### HIGHLIGHTS:

- Paperless processes
- Real-time response: reduce downtime and malfunctions etc.
- Hardware independence
- On-/Offline mode

### FEATURES:

- Assign, create and edit maintenance notifications
- Mobile spare parts management (reserving, removing, booking)
- Enriched notes in the app
- Historical data of technical equipment (design drawing, reload documents)
