

**CARL Source Factory,**  
a single **CMMS** for industrial equipment  
and general resources.

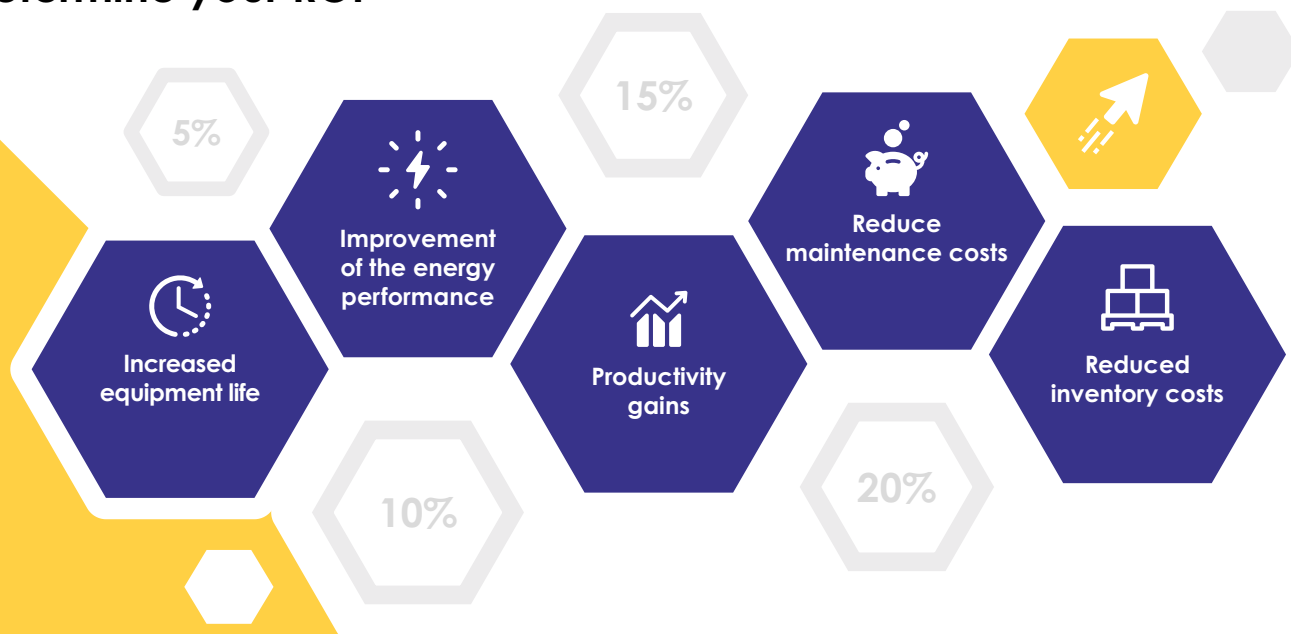

# Optimize your maintenance performance

Maintenance and methods, production or general services departments, CARL Source Factory guarantees the best operating conditions for industrial equipment and associated infrastructures (workshops, buildings, networks, etc.); real-time knowledge of assets, maximum availability of the production tool, safety of installations and personnel...

## Avail of the advantages of a business software dedicated to industry

- **Master** the **entire life cycle** of fixed and linear equipment.
- **Manage** all your **maintenance processes** (curative, preventive, annual shutdowns...), **new works, environmental...**
- **Trace** the **acts of level 1 maintenance** by the production teams (TPM).
- Automatically **integrate** your **regulatory reports**.
- **Graphically plan** your internal and external **resources** (authorizations, permits, production constraints, etc.).
- **Improve** the efficiency of your field **technicians and inventory managers** with a dedicated mobile application.
- **Exchange** with operations via a **service portal** and a mobile application for service requests.
- **Inspect** your purchases, your inventory, your **budgets**, your contracts.
- **Optimize** your activity with a **library of customizable business indicators** (Mean Time Between Failures or MTBF, and Overall Equipment Efficiency or OEE, etc.).
- **Use** our REST APIs and our **catalog of interfaces** to communicate with your Information System: **ERP, MES, CAPM, SCADA**.

## Determine your ROI

# Embrace the maintenance challenges of Factory 5.0

**CARL Source Factory** meets the challenges of the maintenance of the future

## Towards the Digital Twin

### Bring the cartographic dimension to your business management

Integrate, visualize and interact directly with your plans (.DWG), maps (GIS) and digital mock-ups (BIM and CIM).

### Opt for Artificial Intelligence-assisted maintenance

- Make the most of your field data (connected objects and machines) to analyze failures and anticipate breakdowns.
- Automatically optimize your resource planning according to your constraints.
- Benefit from generative AI as a companion for greater efficiency.

# A packaged, scalable platform

SaaS
 On Premise

## Mars

Control your assets, technical installations, networks and equipment.

- ✓ Equipment management
- ✓ Resource management & planning
- ✓ Work Process
- ✓ Reports Wizard
- ✓ Customization: forms, logos, colors

## Neptune

Add inventory and budget management, simplify requests and tailor the solution to your organization.

Includes Mars

- ✓ Inventory management
- ✓ Requester Portal
- ✓ Customization: workflow, catalog interface and RESTful APIs

## Saturne

Complete with purchasing management and adapt the solution to your national or international multi-site context.

Includes Neptune

- ✓ Purchasing management
- ✓ Multi-site and multi-organization
- ✓ International: multi-currency and all languages in the catalog

## Jupiter

Benefit from the most complete offering: standardized connectors, cartographic dimensions and analysis module.

Includes Saturne

- ✓ Business Intelligence
- ✓ Connection to regulatory bodies
- ✓ LDAP authentication and SSO (OIDC)
- ✓ GIS mapping

## Enhance your solution with our 5.0 innovations

Mobile applications

Maps, BIM & CIM drawings

Energy performance

Artificial intelligence

Decision analyse

## Make the most of your solution with our tailored services

### Premium

- A Customer Success Manager for optimum support and ongoing customer satisfaction.
- Technical support available 7 days a week.

### Advanced

A support team available around the clock and access to our Users' Club.

### Standard

Personal access to the customer area (tutorials, FAQ, etc.).
