

Contextualized data you can act on

Save 10,000 hours per year by improving documentation processes with INSIGHT Analytics.

**Includes INSIGHT software features: Productivity, Visibility, Standard.*

INSIGHT Analytics

Your data engine to **discover, analyze and act on** contextualized data for actionable insights.

Discover issues on your shop floor

With our data deep dive projects you can easily find those hard-to-identify issues across your shop floors. Recognize wasted time within your process caused by issues and errors. Discover realistic goals for time and motions studies from KPI's based on actual process executions. Learn how to leverage cost savings from identified issues.

Analyze to empower data-driven decisions

Avoid spending hours manually creating excel reports to analyze productivity. INSIGHT Analytics provides a collection of narrative reports and alerts to quickly monitor issues on your shop floor. Your analysts will be able to leverage unique data points at a granularity they are unable to get from current information systems.

Act and gain more productivity

Enhance your existing shop floor integrations to unleash the full power of process analysis. INSIGHT Analytics helps you to continuously benchmark processes, increase productivity and improve the ergonomics of your workflows. Use our REST APIs to integrate with more services or plug INSIGHT into your own data warehouse, dashboard visualization tool, business intelligence platform or IoT application.

INSIGHT Standard

- Configure Scanners, Gateways, Mobile applications
- Deploy with the latest downloads
- Included with every ProGlove wearable scanner

INSIGHT Visibility

- Monitor device usage & battery status
- Update device fleet configurations & software versions
- Track lost devices & avoid costly scanner replacements

INSIGHT Productivity

- Advanced Scanning for multiple barcode scanning
- Multiscan mode for 5x more preselected barcodes
- Continuous Scanning mode for any 10 barcodes

INSIGHT Analytics

- **Discover** errors by converting raw data into action
- **Analyze** with automated reports
- **Act** & enhance shop floor integrations with more process context
