CRX cobot series

Five models to choose from for a variety of applications such as arc welding, assembling, handling, machine tending, packing, palletising and more.

CRX-5*i*A
Payload: 5 kg
Reach: 994 mm

CRX-10*i*A
Payload: 10 kg
Reach: 1249 mm

CRX-10*i*A/L
Payload: 10 kg
Reach: 1418 mm

CRX-20*i*A/L
Payload: 20 kg
Reach: 1418 mm

CRX-25*i*A
Payload: 25 kg
Reach: 1889 mm

ULTIMATE RELIABILITY

- Smooth, modern design that is completely safe to work side-by-side with people

- Backed by FANUC's decades-long experience in the design and manufacture of robots with world-renowned reliability

- The same uncompromising quality standards that customers expect from FANUC products

- 8 years maintenance free operations

QUICK SETUP

- Slim and compact design allows for easy integration into any work area or existing system

- Easy to install without specialist equipment

- CRX uses FANUC's latest compact R-30*i*B Mini Plus Controller for even more space savings

- Each model runs on standard 230V power

EASY PROGRAMMING

- Easily program and teach points on your new CRX cobot using all-new lead-through programming features and new teach pendant user interface

- Perfect solution for manufacturers with little to no robotic experience

- Connecting to peripheral equipment is easy with a wide selection of FANUC approved suppliers

- FANUC intelligent features allow for easy connection to 2D and 3D *i*RVision and more
