

clever – creative – sustainable – smart

Pallets

[utzgroup.com](https://www.utzgroup.com)

UPAL: strength starts at the base

Plastic or wood?

Plastic pallets are not an economical alternative to wooden pallets. Plastic pallets, however, have key advantages: they have a constant weight, are robust and durable, have a longer life than wooden pallets and, with metal reinforcing, are particularly sturdy and suitable for use in high-rack warehousing.

If desired, plastic pallets can be produced in a version which is electrically conductive or equipped with a non-slip top deck. Fully enclosed pallets are easy to clean and are particularly suitable for the food, hygiene and clean room sectors. Utz pallets (UPAL) are available as Euro, ISO or half pallets.

Utz pallets load safety

Things can often slip on the smooth upper deck of a pallet. However, there is an anti-slip coating for our pallets:

Elastomeric coating

The elastomer coating on the top deck of the pallet consists of a 2-component polyurethane coating. Therefore, a rubber-like glossy surface with excellent non-slip properties is created.

Elastomer-coated stripes

In this case, the elastomer coating is not applied over the entire surface, but distributed on three stripes. An anti-slip effect is only possible, however, when the load is in contact with the elastomer stripes.

Grip paint or silica sand

Grip paint and silica sand result in a fine, grainy texture on the top deck of the pallet. Therefore, the pallet maintains particularly good anti-slip properties.

A comprehensive pallet program

A comprehensive pallet program

utz UPAL-H

Clean, stable and closed all round

UPAL-H is closed on all sides, is therefore easy to clean and frequently used in the food, hygiene and clean-room segment. Due to its reinforcement with metal profiles, the pallet is suitable for high-bay storage.

utz UPAL-I

Robust, resilient and versatile

The UPAL-I is a robust industrial pallet, which is particularly sturdy in handling and has a very long service life due to its strong construction. Steel profiles can be inserted, if required, making the pallet suitable for high-bay storage. To protect against slipping, anti-slip pins can be attached to the upper deck and the forklift contact area.

utz UPAL-U

Robust, easy to handle and light

The UPAL-U is particularly quiet on roller tracks and is also suitable for high-bay storage due to its steel profiles. The pallet is relatively light, so that it can also be easily carried by its two handles.

utz UPAL-S

Clever, flexible and reinforced, therefore suitable for racking

The UPAL-S is a robust and resilient pallet, with increased stability due to metal profiles, which can be inserted into designated recesses. This reinforcement makes the UPAL-S suitable for high-bay storage. The pallet can be equipped with anti-slip strips.

utz UPAL-E

System-compatible and stackable

The advantages of the stackable export pallet UPAL-E are found in its suitability for use on automatic conveyor systems. It is therefore the perfect solution for smooth handling in intralogistics. The UPAL-E offers a usable area of 800 x 600 mm or 1200 x 800 mm and studded fields, as well as a safety rim to secure the load.

utz UPAL-H1

Easy to clean and stable

The UPAL-H1 is easy to clean and is therefore frequently used in the food, hygiene and cleanroom segment.

utz UPAL-V

Variable, flexible and adaptable

The UPAL-V can be perfectly adapted to customer requirements: The number of feet, runners and metal reinforcements can be modified depending on customer requests. Optional metal reinforcements provide the UPAL-V with the required stability and resilience. Additionally, the feet, runners and metal bars can be simply and easily replaced.

utz UPAL-D

Small, easy to handle and versatile

The display pallet was designed especially for the food sector: Connector systems on the upper deck and on the sides are suitable for the insertion of display boards. The light pallet is also suitable for manual forklifting from all four sides and can also be transported on automatic conveyor systems.

UPAL-H: clean, sturdy and completely enclosed

The UPAL-H is completely enclosed, therefore it is easy to clean and is often used in the food, hygiene and clean room sectors.

Metal reinforcement

Inlaid metal tubes inserted in the pallets increase stability. The UPAL-H is therefore suitable for high rack warehousing.

Lower surface

Completely closed lower surfaces and runners.

The true hygienic pallet comes from Utz!

The University of Applied Sciences Wädenswil/Switzerland (Department of Foodstuffs Microbiology)* has tested the UPAL-H along with some of the most frequently used competitive plastic pallets in an independent test to examine their hygienic quality. All plastic pallets made especially for the food and pharmaceutical industry (with flat and slotted surface) were inoculated at a number of defined points with 6 test micro-organisms (escherichia coli, saccharomyces cerevisiae, aspergillus niger, pseudomonas fluorescens, bacillus cereus spores and staphylococcus capitits) and then cleaned.

Test arrangement

Microbiological investigations were carried out:

- before cleaning
- after cleaning (Pos. 1 - 6)

'The cleaning results show that the Utz hygiene pallet shows a better result in comparison with competitive products. This confirms the claim that the Utz UPAL-H is the recommended product for use in sensitive zones in the foodstuffs area'.

(The analysis of the test results is with Georg Utz AG.)

* The University of Applied Sciences Wädenswil/Switzerland is a member of the Zurich Association of Universities of Applied Sciences.

UPAL-I: robust, durable and versatile

The UPAL-I is a durable industry pallet which is particularly safe to handle. Due to its robust construction, the pallet is long-lasting in use.

Steel profiles

The pallet can be reinforced with up to five steel profiles.

Safety edge

This is outboard, so the entire surface area of the pallet is available.

Anti-slip pins

The pins can be mounted subsequently to the upper deck and the lower surface forklift contact area. **Article code 33-1208I-950** (one pin)

UPAL-S: clever, flexible and reinforced for shelf use

The UPAL-S is a robust and sturdy pallet; its stability is enhanced by metal tubes that can be inserted into the recesses provided. As a result of this reinforcement, the UPAL-S is suitable for high-rack warehousing.

Metal reinforcement

Metal tubes increase the stability of the UPAL-S. As a result, the pallet is suitable for high-rack warehousing.

Anti-slip stripes

Non-slip upper deck variant.

Upper deck variants

Increased load safety with different upper deck versions.

Base dimension **1200 x 800 mm**

utz **UPAL-S**

3 runners lengthwise non reinforced

Height without / with safety edge		160 mm / 170 mm
Weight		14.00 kg
Load bearing capacity* (at 23° C room temperature)	static	6000 kg
	dynamic	1500 kg
	racked	500 kg (support on short side)
Article code	Surface	
33-1208S-639-000 R	smooth, open, with water drainage holes	
33-1208S-739-000 R	interrupted onboard safety edge, open, with water drainage holes	
33-1208S-939-000 R	continuous onboard safety edge 20 mm, open, with water drainage holes	

* The load and the weight may vary depending on the number of tubes and their wall thickness. We recommend that you test the pallet before use.

Article code with **R** = made of recycled material

Base dimension **1200 x 800 mm**

utz **UPAL-S**

3 runners lengthwise

non reinforced

Height without / with safety edge		160 mm / 170 mm
Weight		16.00 kg
Load bearing capacity* (at 23° C room temperature)	static	6000 kg
	dynamic	1500 kg
	racked	500 kg (support on short side)
Article code	Surface	
33-1208S-630-110 R	smooth, with anti-slip stripes	
33-1208S-730-110 R	interrupted onboard safety edge, with anti-slip stripes	
33-1208S-930-110 R	continuous onboard safety edge 20 mm, with anti-slip stripes	

reinforced, 3 metal tubes lengthwise

Height without / with safety edge		160 mm / 170 mm
Weight		19.00 kg
Load bearing capacity* (at 23° C room temperature)	static	7500 kg
	dynamic	1500 kg
	racked	1250 kg (support on short side)
Article code	Surface	
33-1208S-630-113 R	smooth, with anti-slip stripes	
33-1208S-730-113 R	interrupted onboard safety edge, with anti-slip stripes	
33-1208S-930-113 R	continuous onboard safety edge 20 mm, with anti-slip stripes	

* The load and the weight may vary depending on the number of tubes and their wall thickness. We recommend that you test the pallet before use.

Article code with **R** = made of recycled material

UPAL-E: light, functional and sturdy

The use of a UPAL-E is certainly useful when the cost of returning the empty pallets exceeds their value. Nevertheless, the UPAL-E is loadable and picks up the load in a non-slip manner.

Volume reduction

The cavities in the feet of the UPAL-E allow optimum stacking. 25 pallets nested one inside the other result in a stacking height of only 1 metre.

Runners

They are perforated at the bottom so that liquids can drain off immediately.

Base dimension **1206 x 806 mm**

utz **UPAL-E**

3 runners lengthwise non reinforced

Height		151 mm
Weight		6.35 kg
Load bearing capacity* (at 23° C room temperature)	static	800 kg
	dynamic	400 kg
	racked	unsuitable
Article code	Surface	
33-1208B-0 R	slotted, onboard safety edge 18 mm	

non reinforced

Height		133 mm
Weight		6.40 kg
Load bearing capacity* (at 23° C room temperature)	static	800 kg
	dynamic	400 kg
	racked	unsuitable
Article code	Surface	
33-1208B-2 R	slotted, smooth	

* The load and the weight may vary depending on the number of tubes and their wall thickness. We recommend that you test the pallet before use.

Article code with **R** = made of UIC® recycled material

UPAL-H1: clean, sturdy and completely enclosed

The UPAL-H1 is easy to clean and is therefore frequently used in the food, hygiene and clean room segment.

Food-safe

The pallet can also be used for direct contact with meat.

Base dimension **1200 x 800 mm**

utz **UPAL-H1**

3 runners lengthwise non reinforced

Height		159 mm
Weight		18.00 kg
Load bearing capacity* (at 23° C room temperature)	static	5000 kg
	dynamic	1250 kg
	racked	1000 kg (support on short side)
Article code	Surface	
33-1208H-01-001-IV-18	slotted, with centre arresting, interrupted onboard safety edge, GS1 printing	
33-1208H-03-001-IV	smooth	

* The load and the weight may vary depending on the number of tubes and their wall thickness. We recommend that you test the pallet before use.

UPAL-V: adjustable, flexible and adaptable

The UPAL-V adapts perfectly to customer requirements: by modifying the number of feet, runners and metal reinforcements, a large number of different versions can be created. The optional metal reinforcements give the UPAL-V the desired stability and resilience. In addition, feet, runners and metal rods can be readily and easily replaced.

Metal reinforcement

If required, the UPAL-V can be reinforced with steel profiles.

Base dimension **1200 x 1000 mm**

utz **UPAL-V**

3 runners lengthwise or 9 feet reinforced, 6 metal tubes

Height		160 mm
Weight		17.70 kg
Load bearing capacity* (at 23° C room temperature)	static	3000 kg
	dynamic	1500 kg
	racked	500 kg
Article code	Surface	
33-1210V-3GS6R	slotted, interrupted outboard safety edge 22 mm	

Circular runners reinforced, 7 metal tubes

Height		160 mm
Weight		18.90 kg
Load bearing capacity* (at 23° C room temperature)	static	5000 kg
	dynamic	2500 kg
	racked	1000 kg
Article code	Surface	
33-1210V-4S7R	slotted, interrupted outboard safety edge 22 mm	

* The load and the weight may vary depending on the number of tubes and their wall thickness. We recommend that you test the pallet before use.

Article code with **R** = made of recycled material

Stacking frame 1200 x 800 mm

Lightweight with high stability

It is the hygienic alternative to wooden pallet frames, as there is no contamination by splinters and therefore no risk of injury. The frames are easy to fold and space-saving to store.

Save space

Three folded frames lying or four folded frames standing fit into an open frame.

Standard colour
dark grey

To fit plastic and wooden pallets

External dimensions	1213 x 813 x 200 mm
Internal dimensions	1141 x 742 x 200 mm
Weight non reinforced	5.80 kg
Weight reinforced	6.40 kg

Article code	Model
