Transport management system – TMS – Forwarding software
Logistics software – Planning software – Transport optimisation software

The solution you are looking for has many names

We present CarLo®–the perfect solution for you

Transport management software includes software components for the management, calculation, invoicing, control and execution of transport services.

Transport management systems are used in logistics and forwarding to efficiently organise transports, reduce costs, avoid paperwork, automate processes, relieve the staff and increase the transparency and security of supply chains.

That is exactly what CarLo® does–On the following pages, we will show you how.

Your transport process from A to Z integrated in one comprehensive digital system

**“ CarLo® is a unique system.
It is easy to configure and highly
user-friendly–in my opinion,
it is a very well thought-out program.**

– Stephen Marley, Marley's Transport Pty Ltd, Hope Valley (Australia)

CarLo®

Logistics software for transport management and planning

Master Data

The Master Data area allows you to manage all relevant information regarding your business partners, fleet and staff.

Business partners

- Creation of new business partners via an intelligent Web company search
- Automatic duplicate check
- Specification of numerous restriction tests: e.g. loading and unloading restrictions with regard to dimensions/weight, the access to the loading ramp, opening hours, etc.
- Appointment management including reminders
- Document filing including validity checks for e.g. EU licences

Staff

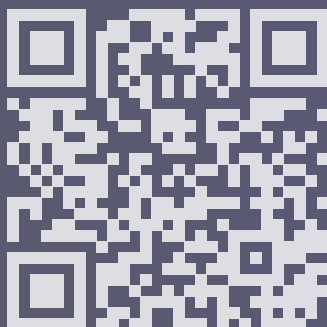

Pricing rules

Fleet

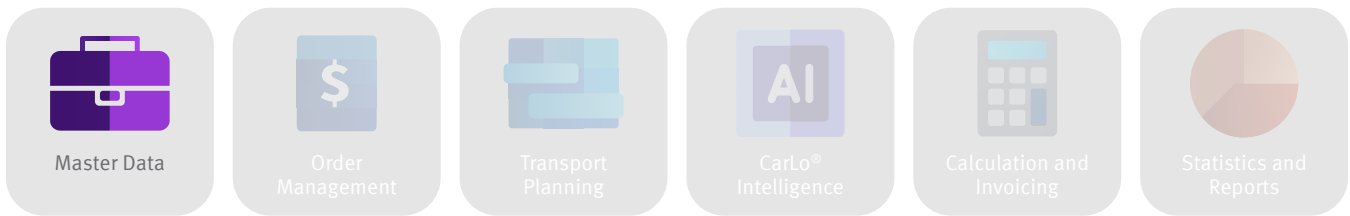

With our add-on **CarLo® inMOTION** on page 20, you also get access to extended vehicle master data and fleet processes.

Messenger service CarLo® Connect

Allows for a simple and seamless data exchange with colleagues and even other companies using CarLo®—thanks to the integrated chat functionality.

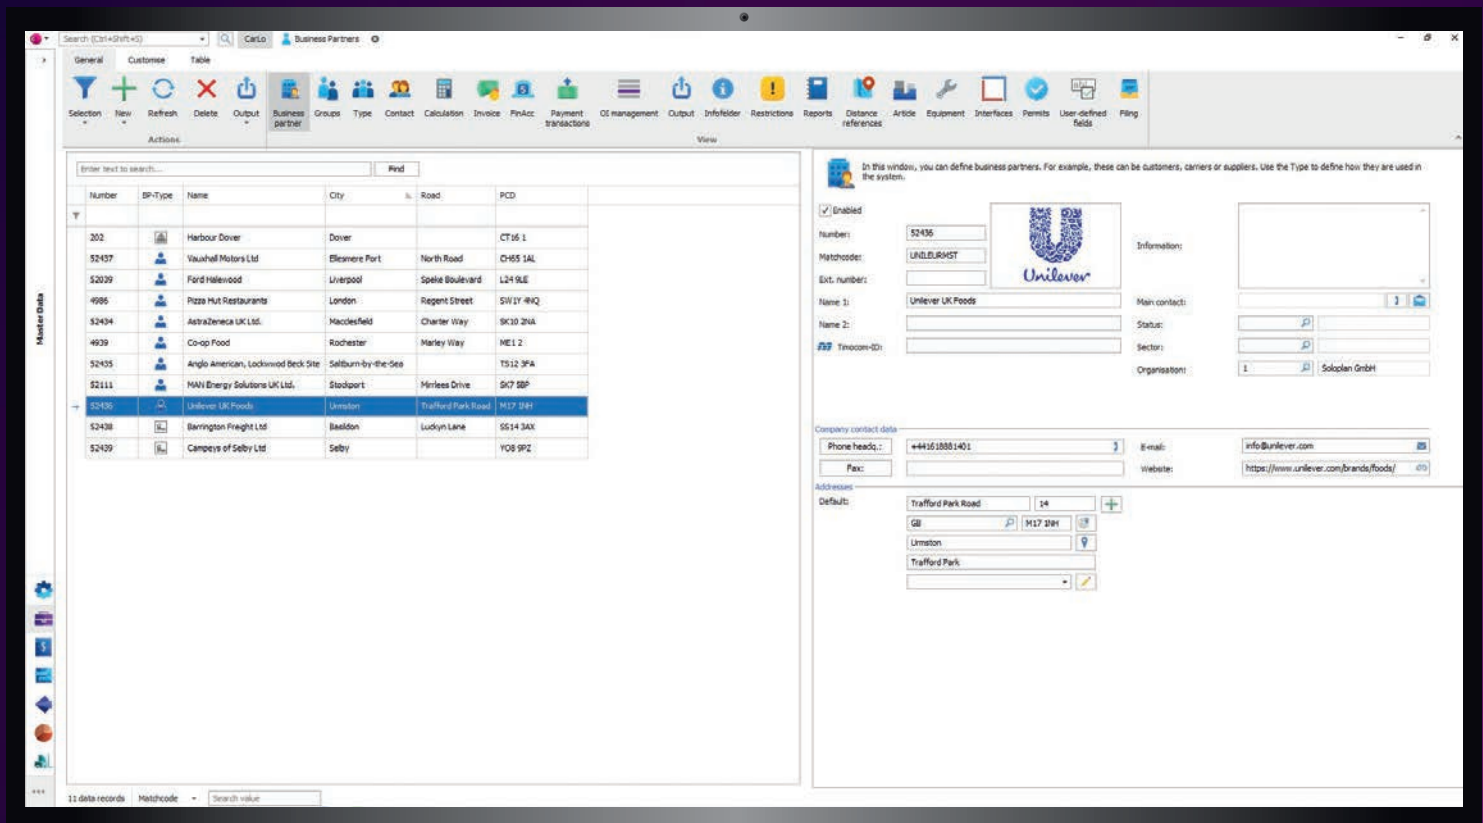

Discover our **product videos** on our YouTube channel

“ Thanks to the continuous optimisation of our work processes, we were able to increase efficiency.

– Daniel De Cae, Klaus Baum Transporte AG, Weiswampach (Luxemburg)

Carlo®

Logistics software for transport management and planning

Order Management

The Order Entry area allows you to enter all relevant information regarding customers, loading and unloading points as well as the load fast, comfortably and efficiently.

Basic functions

- OCR text recognition
-  Document Intelligence: AI-supported text recognition
- Business partner and price suggestions on the basis of historical data
- Address check and completion
- Integrated task lists
- Customisable user interfaces
- Configuration of user-defined workflows
- Intuitive quote entry: manually or via OCR
- Automated credit limit check of the customers
- Check for national and regional holidays

CarLo® Intelligence

Calculation and Invoicing

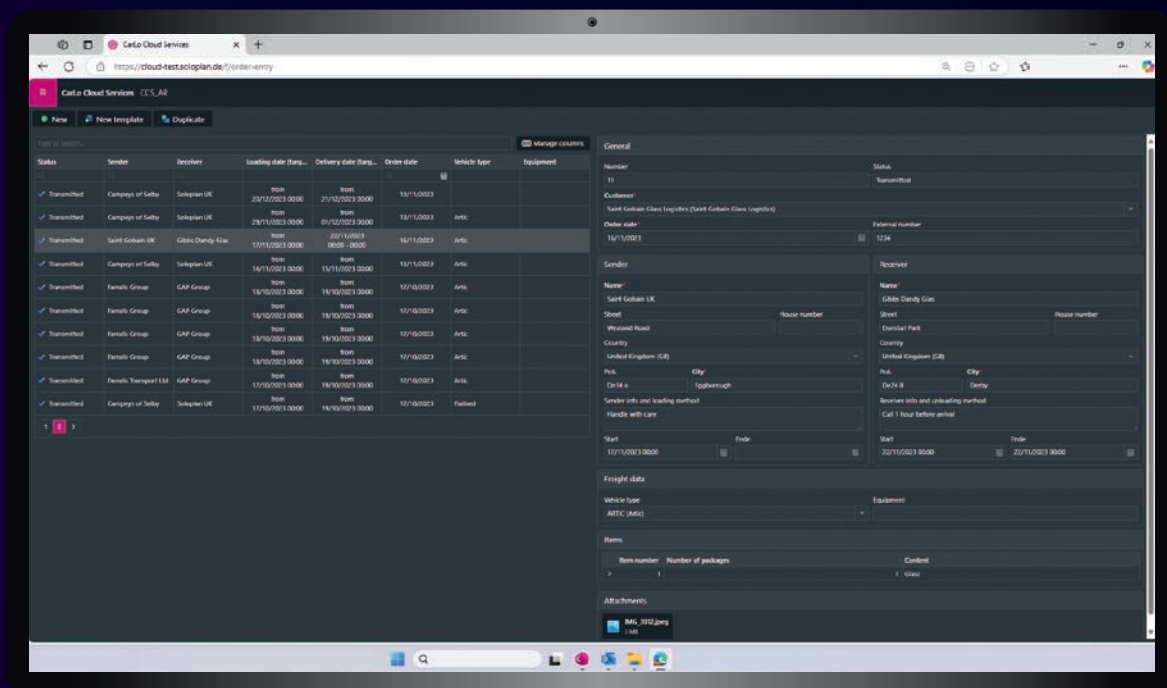

Statistics and Reports

“ Thanks to automated order entry, we save hours of manual work every day. We are glad to have taken a step into the future.

– Lina Raddatz, Spedition Raddatz GmbH, Jork (Germany)

Our add-on **CarLo® Cloud Services** allows our customers to externally create orders online—see page 15.

CarLo®

Logistics software for transport management and planning

Transport planning

In Transport Planning (in the Planning area), open orders are perfectly combined and planned with the available resources. Orders can be optimised both in terms of cost reduction and with regard to an increase of the full use.

Highlights

- Multiple editing possible
- Tour planning via drag & drop
- Automatic restriction tests

Maps and routing

- Visualisation of vehicles and orders
- AI Stop sequence optimisation
- Geofencing with notification functionality
- Detailed toll costs

Resource usage plan

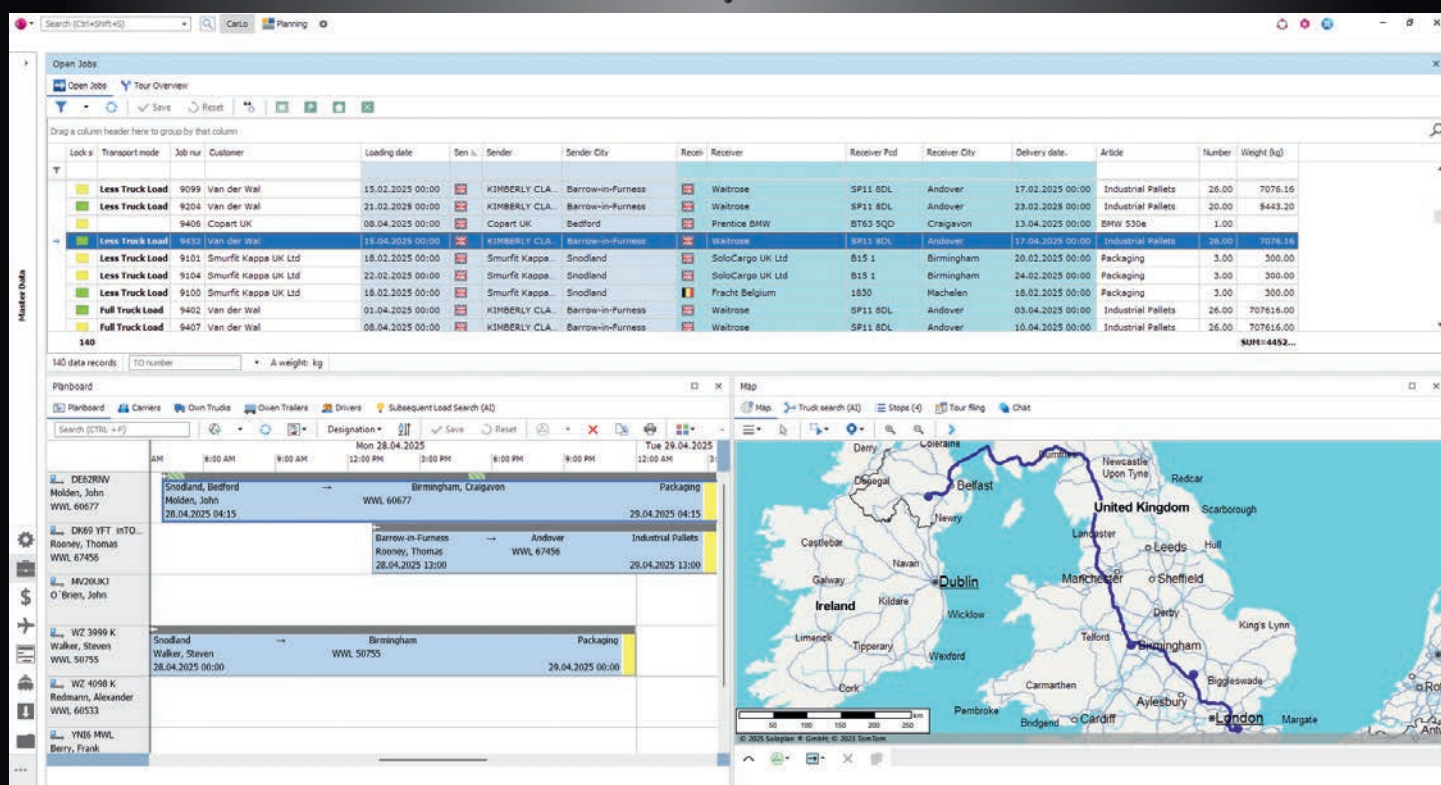

- Display as time line/calendar view and dynamic display of real-time data
- Vacation and absence planning

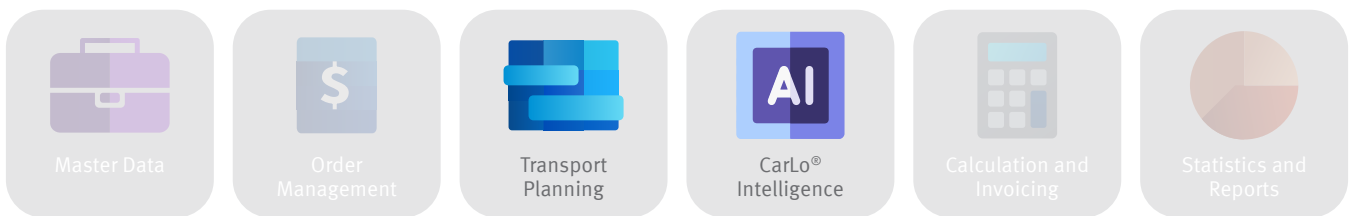

Telematics

- Transmission of tours, orders, status messages and exchange of chats, photos and documents

You can find further information on our telematics add-on **CarLo® inTOUCH** for Android/iOS on page 12.

- Simple connection to common telematics providers

CarLo® Intelligence

Transport planning redefined: Artificial intelligence in our software helps your company make your logistics processes smarter and facilitate decisions.

AI CarLo® Assistant

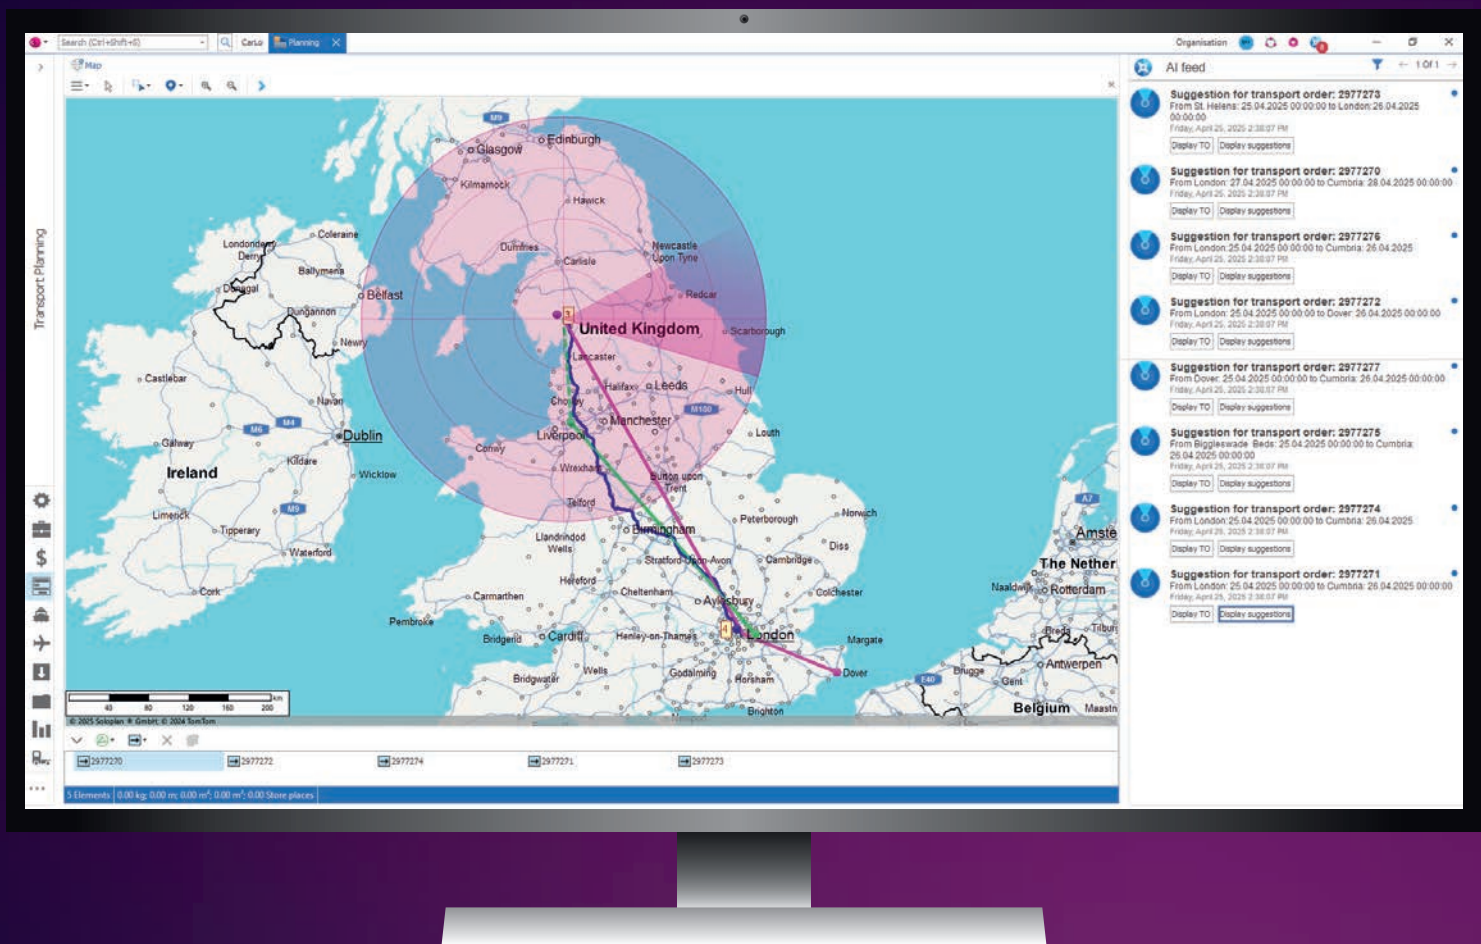

- Answers questions about the use of CarLo®
- Creation of formulas and workflows via simple text entry

AI Document Intelligence

- Extraction of texts, tables and structures
- Automatic allocation of data to fields

AI Transport Intelligence

- AI-supported suggestions
- Automated loading search with planning radar
- Tour planning on the basis of experience values
- Carrier, price and vehicle suggestions
- Delay and reliability prognosis
- Intelligent full-text search functionality

CarLo®

Logistics software for transport management and planning

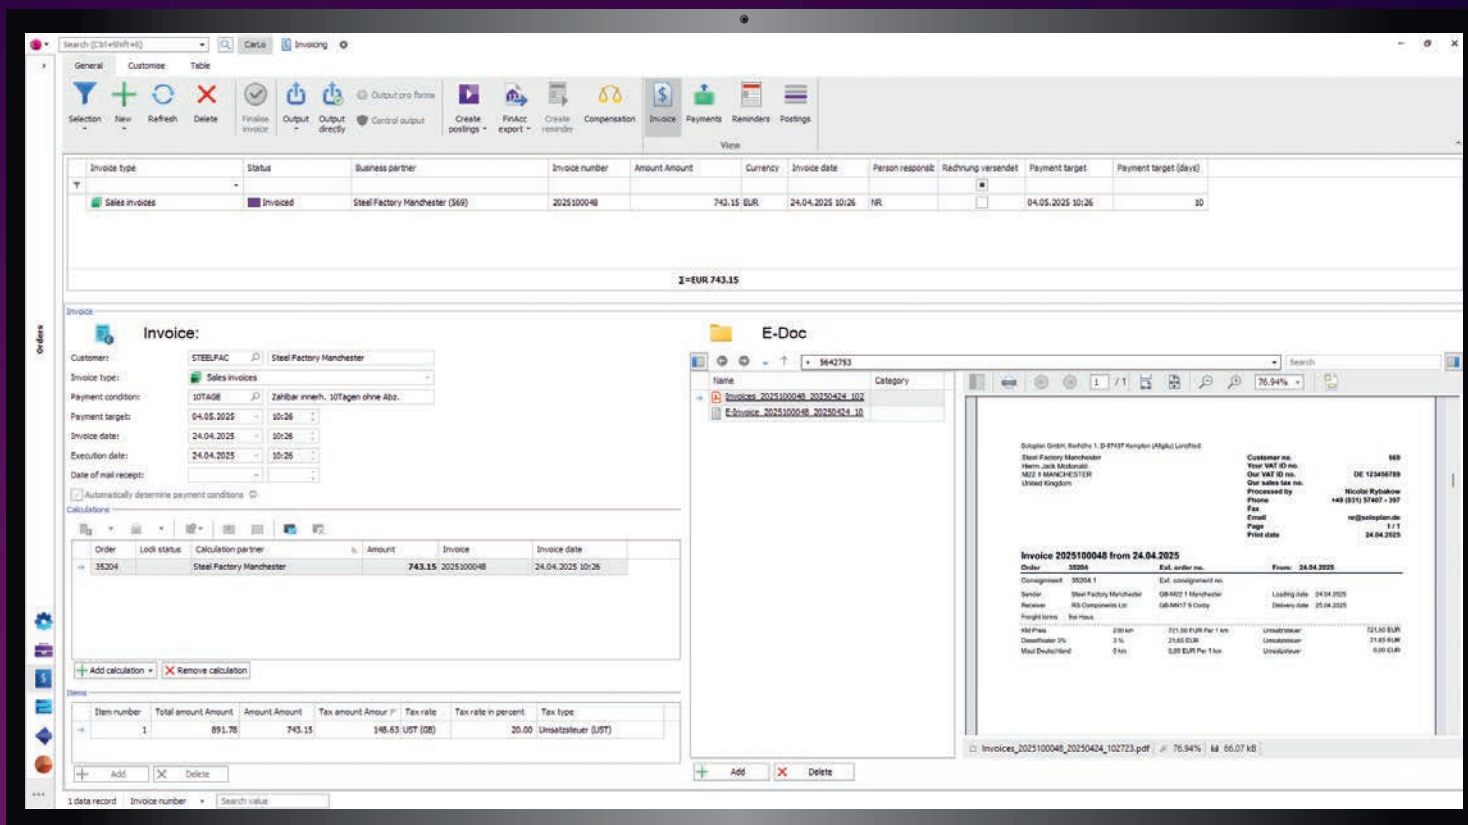

Calculation and Invoicing

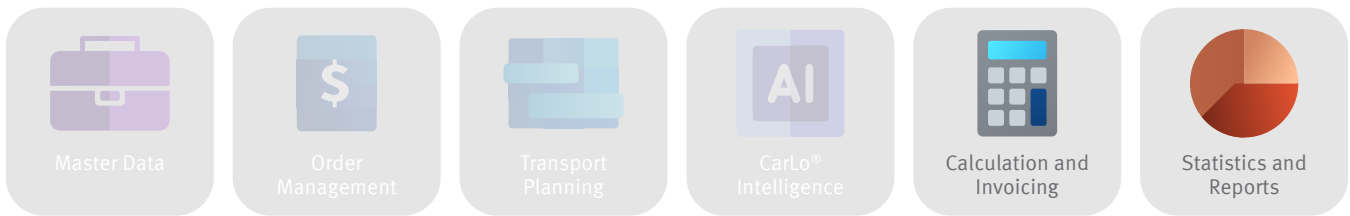

CarLo® comfortably supports you with automatic price determination for sales invoices and credit notes –whether with a flat rate or complex tariff tables.

Automatic calculation

- Automatic e-mail dispatch of the sales invoice
- Automatic attachment of vouchers/delivery documents
- Creation, dispatch and master sales invoices
- Fully automatic price determination with tariff tables
- ISO-compliant CO₂ calculation
- Output of E-invoices
- AI Document intelligence with eCMR

The **CarLo® Cloud Services** –see page 15– additionally provide an audit-proof E-archive, for example, for sales invoices.

Statistics and Reports

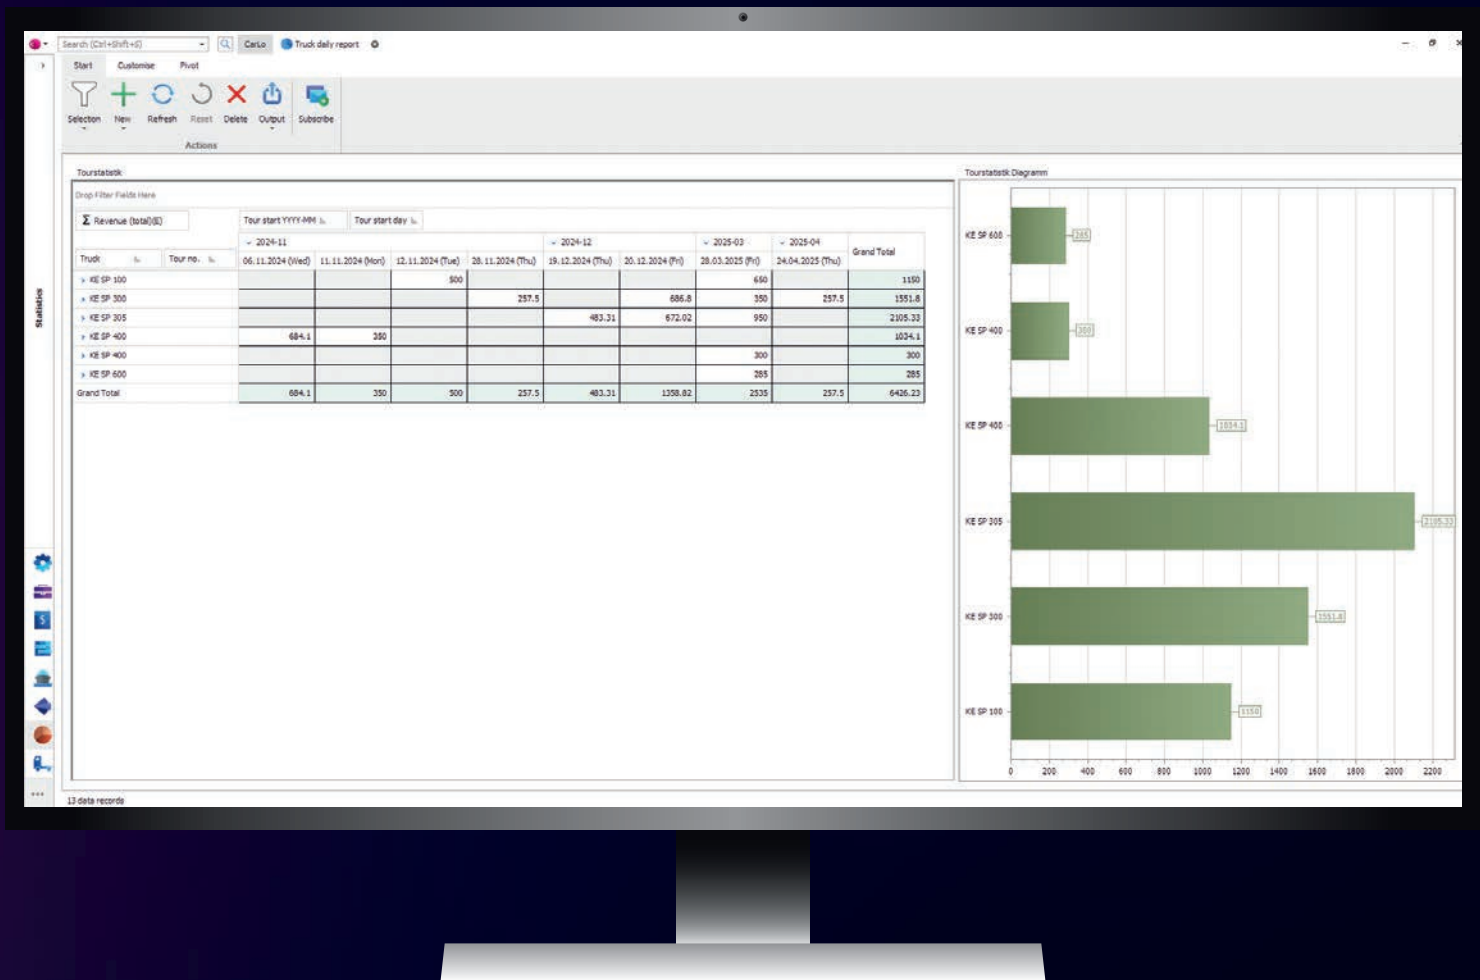

Our TMS CarLo® eliminates the time-consuming manual creation of statistics and reports. This allows you to gain a quick overview of optimisation potentials.

Visualisation of key figures

- Various display options
- Fast profitability analysis
- Automatic dispatch
- Export option as Excel file or to other BI tools
- Simple creation of individual cockpits and dashboards

Direct integration of live data into planning

Simple interpretation of complex data

CarLo® inTOUCH

Telematics including positioning
Mobile order management

Monitor your tour progresses and keep in contact with your drivers

With CarLo® inTOUCH, you can optimise the communication and documentation of your tours thanks to efficient electronic feedback. Receive important documents and status updates directly on the go.

Overview

- Real-time tracking
- Digital order transfer
- Connection to truck navigation
- Chat function for drivers and dispatchers
- Direct scan of, for example, delivery documents
- Status messages and automatic notifications
- App for iOS and Android available in 15 languages

Digital order transfer

- (Un)loading address and (un)loading times
- Contact data of your contacts
- Stop sequence
- Freight documents

Reliable tracking and tour management

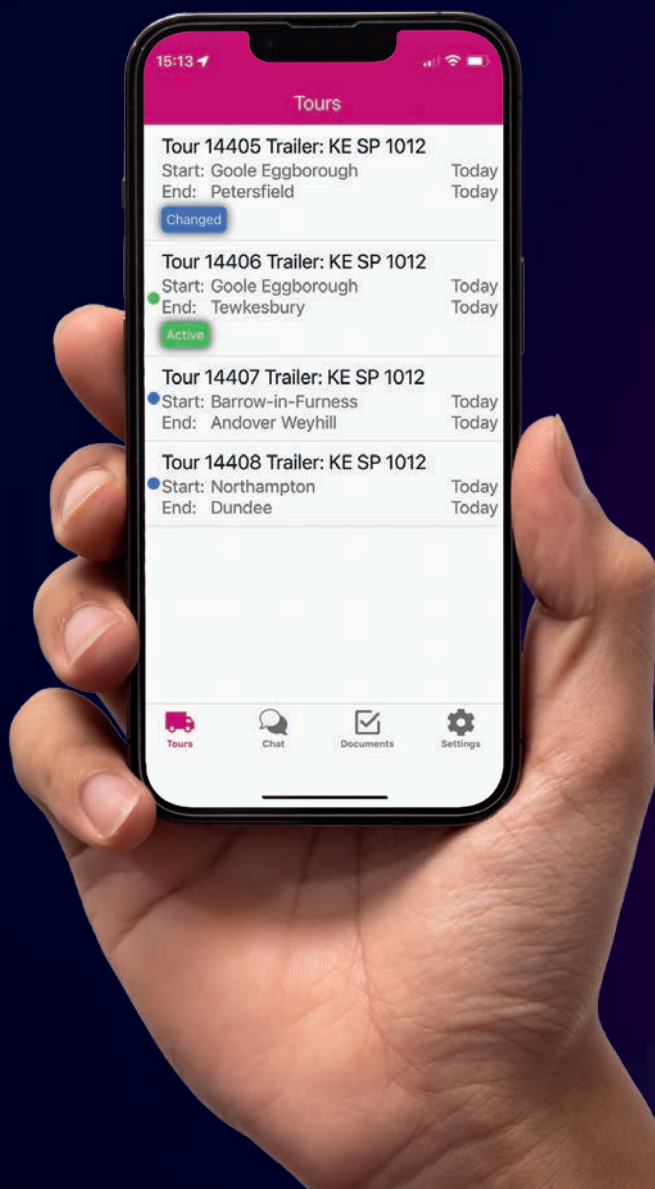

- Current vehicle position in real time
- Complete tracking of the tour progress on digital map
- Monitoring of arrival, departure and waiting times
- Better tour planning and prevention of time losses
- Overview of driving, working and break times
- Ensuring compliance with legal requirements and increasing driver safety
- Entry of pallets and weight data by the driver
- Error-free documentation of the load
- Precise estimation of the arrival time thanks to geofencing
- Better planning and reliable information for customers

Fast document transmission

Drivers send documents and vouchers by taking pictures.

Freely configurable checklists

Simplify the return of data with checklists for damage notifications, digital signatures, departure checks and actual weight specifications—either as a separate list or directly integrated into the work process.

User-friendly driver assistance

- Easy navigation via Google Maps and Apple Maps
- Contacts can be reached with one click
- Immediate updates for tour changes as pop-up messages

Pick-up and delivery scanning

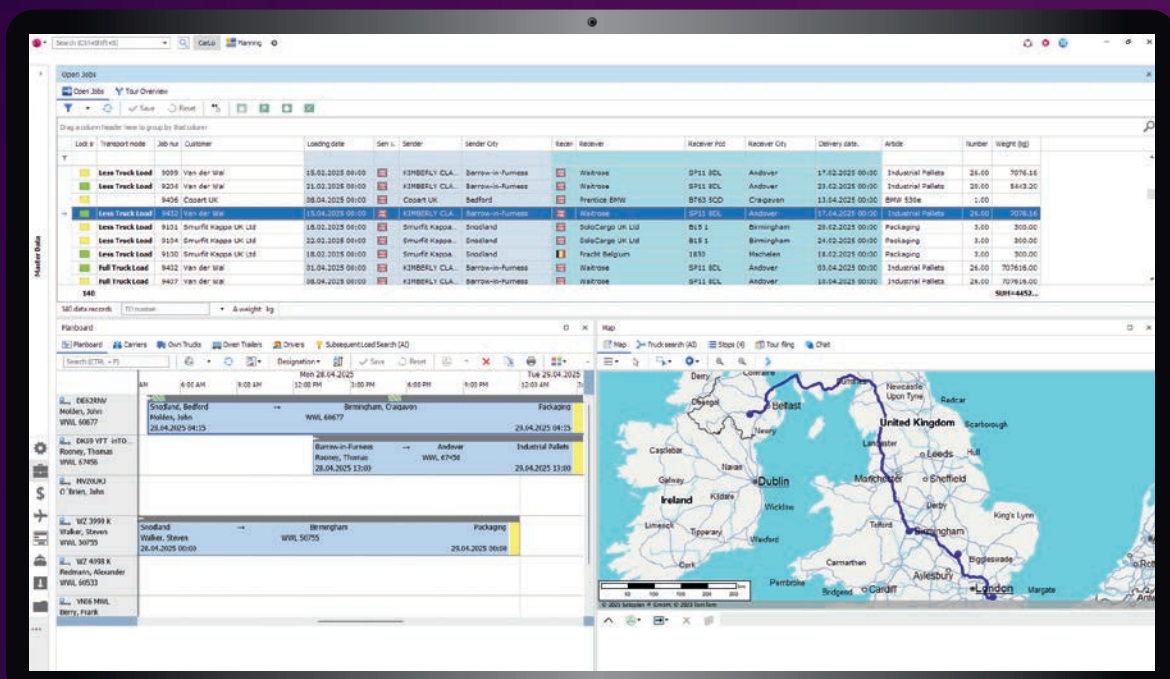

- SSCC scan and status per SSCC
- Missing quantities
- Automated barcode recognition

Geofencing

GPS geofencing allows you to record arrival and departure times. An automatic notification is sent to the customers or dispatchers in case of a delay. The software can automatically trigger different processes.

“With CarLo® inTOUCH, the communication between the operations on the road and the data entry in the back office has become seamless.

– Eben Fourie, M&A Logistics, Cape Town (South Africa)

CarLo® exCHANGE

Web-based company portal
Order allocation to subcontractors

Logistics networking—simple and profitable

Comfortably allocate transport orders and entire tours to subcontractors with the Web-based company portal CarLo® exCHANGE.

Overview

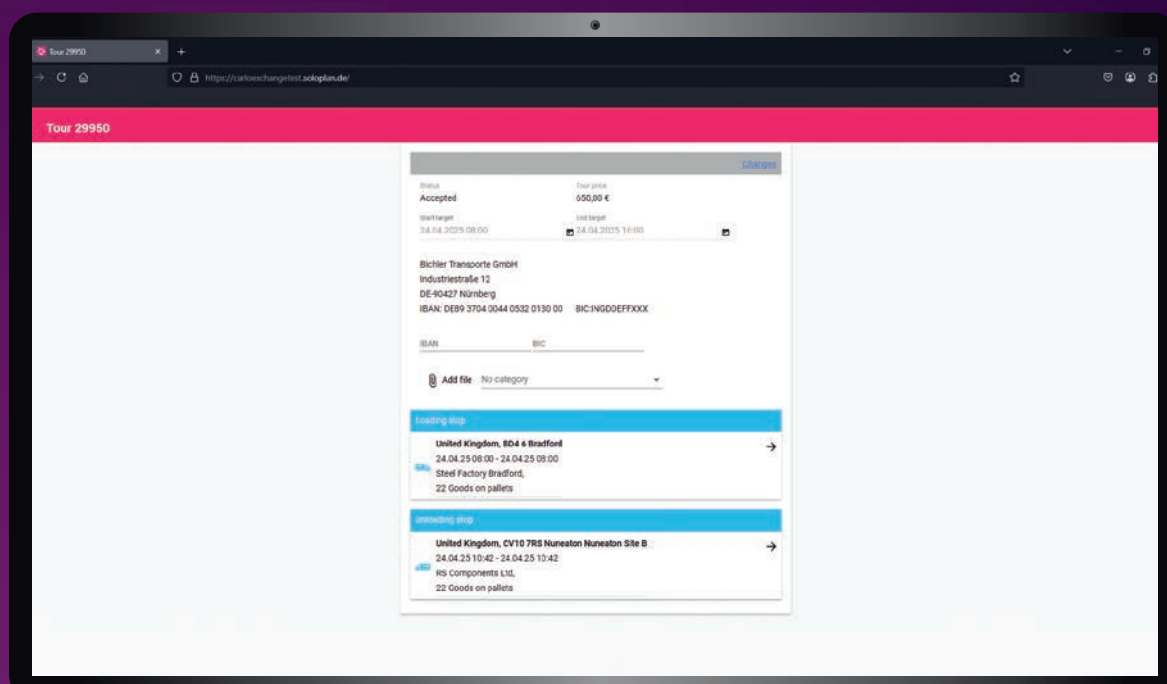

- Web-based platform for the allocation of transport orders/tours
- Direct or tender-based allocation
- Automatic data exchange
- Access to all relevant documents for unregistered users via a direct link

Real-time data transfer

- Precise live status tracking and immediate feedback
- Automated allocation of relevant documents

Easy order allocation

- Direct Order—automatic data exchange of all information and documents upon selection of the carrier
- Best Offer—publication of transport orders in closed groups and selection of the favourite for the execution from different tenders
- Detailed item lists such as quantity, weight, volume
- Display of target loading times and stop sequences
- Comprehensive loading point information
- Delivery documents/PODs of subcontractors are directly saved in CarLo®

Your personal cloud with a wide range of possibilities

Your business partners who do not use CarLo® themselves yet can externally create transport orders or view consignment tracking—this and much more is as easy as pie with the CarLo® Cloud Services.

Overview

- Access via Web browser from all devices
- Location-independent management
- User-friendly and compatible with mobile devices
- Simple order entry—online and without API
- Detailed consignment tracking in real time with our Track & Trace system
- Own access for customers

Audit-proof E-archive

Digitally store all relevant electronic documents, such as sales invoices, in our cloud—in a legally compliant and audit-proof format. Countless paper folders or fire-proof storage media thus belong to the past.

Additionally, you have the possibility to create a guest access for tax consultants or auditors.

The screenshot displays the CarLo Cloud Services web interface. The top navigation bar includes 'CarLo Cloud Services' and a 'Switch portals' dropdown set to 'SpCoWest'. The main interface is divided into two sections: 'Track & Trace' on the left and a detailed view on the right.

CarLo® inSTORE

Warehouse management solution
Control of warehousing processes

Optimise your warehouse management efficiently and effortlessly

CarLo® inSTORE offers a flexible solution for the management of your stock with real-time insight in warehouse transactions and stocks.

Overview

- Combined warehouse and transport processes for stock placement/removal
- Automated stock removal process for transport orders for stored goods
- Central article management
- Direct access to the warehouse stock in order management
- Graphic storage place management
- Selection of different warehouse strategies
- App for all customary scanners

Simplified inventory

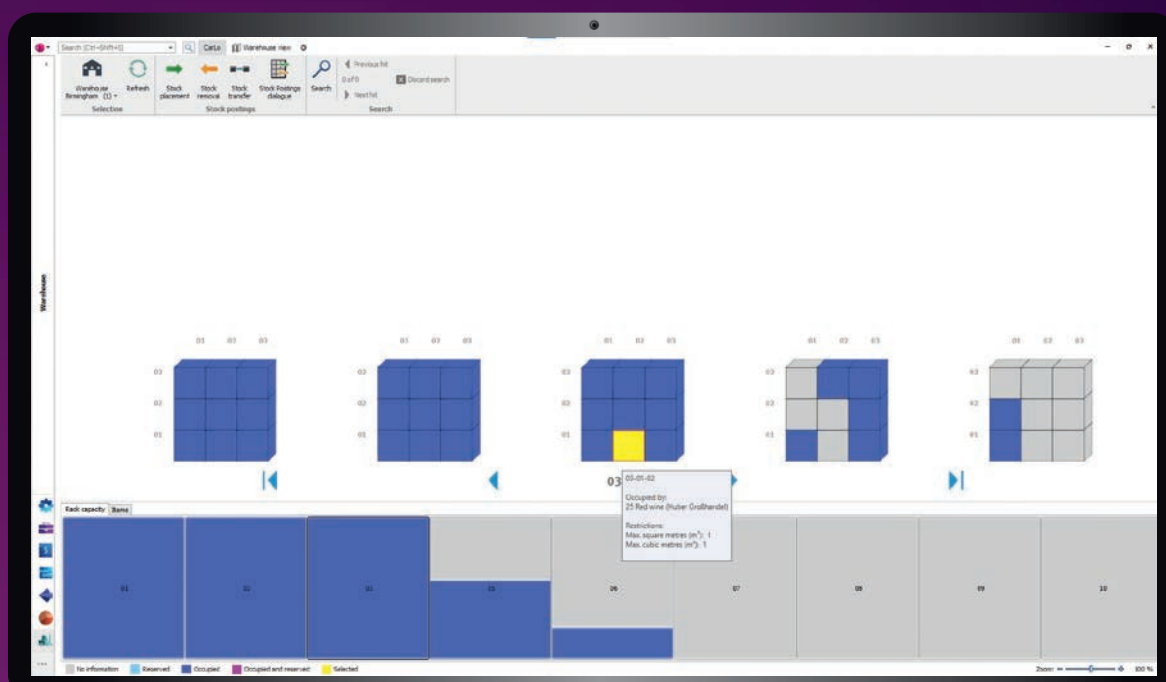

- Simplified mobile data entry
- Real-time reconciliation of the stocks
- Support of permanent cut-off date inventories

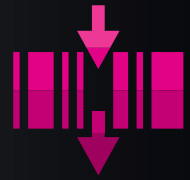

Comprehensive reports and analyses

- Detailed reports regarding stocks, stock turnover and deliveries
- KPI dashboards for monitoring the performance
- Export options with different formats (PDF, Excel, CSV)

Flexible warehouse management

- Prevention of excess stock, multiple entries and bottlenecks
- Management of multiple warehouse locations
- Flexible storage place management within the warehouse

Digitally manage your cross docking processes—optimally control your transshipment warehouse

With CarLo® in HUB, you not only have an overview of your transshipment warehouse, but also of the entire logistics process with the individual steps Inbound, HUB and Outbound.

Intuitive app

- Free configuration and intuitive user interface
- Real-time data exchange

Effortless scanning

- SSCC scan or master SSCC per package
- Status display per SSCC or master SSCC
- Missing quantities messages
- Configurable checklists
- Creation of master barcodes

Planning

- Barcode creation or import
- Overview of open and already scanned packages
- Direct access to all incoming and outgoing transactions
- Transparency due to real-time data synchronisation

Warehouse

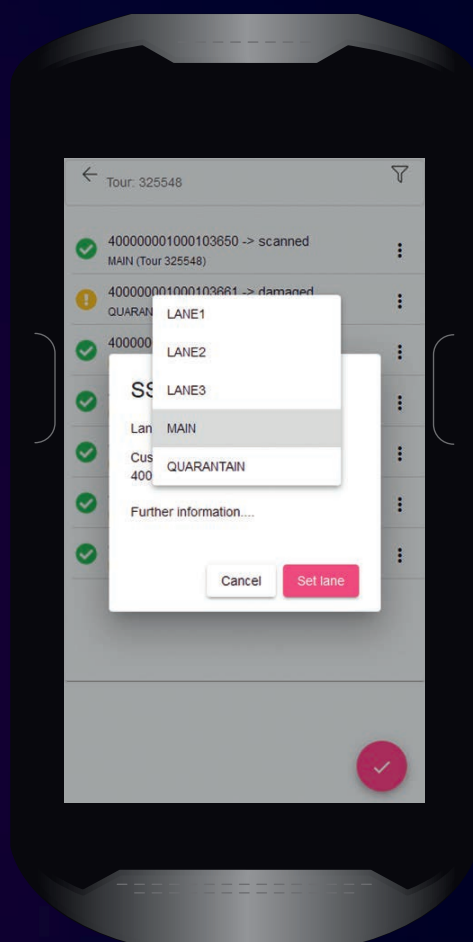

- Digital (un)loading lists
- Customised process thanks to workflows and checklists
- Fast documentation of damaged and incorrect goods

Smooth goods flow

- Unique structure and lane definition
- Intermediate storage and efficient goods transshipment
- Automated planning

Synergetic team integration between transshipment warehouse and dispatchers

- Employee planning
- Barcode management
- Digital (un)loading lists

Manage international transports in the air and on the high seas

CarLo® inAIR&SEA accompanies you throughout the entire transport process of air and sea freight—comfortably, efficiently and intermodally.

Reliable sea freight processing

Manage all transport details relevant for sea freight, such as shipping line and vessel specifications, in one software. Apart from transport planning between ports, you also have the possibility to cover the management of container pick-ups and returns on request.

Sea freight management

- Sea freight carrier management
- Handling of sea-freight exchange rates

Document management

- Printing all documents relevant for sea freight
- eVGM handling
- Integration of Incoterms

Tracking and status

- Tracking and status notifications in real time
- Connections to sea freight platforms
- Interfaces to online portals such as DAKOSY and BHT

Compliance and security

- Automatic validity check of the container number
- Interfaces to INTRA, customs and compliance checks
- Integration and support of security and freight terms information

City and location management

- UN/LOCODES
- POL/POD (Port of Loading/Port of Discharge)

Reliable air freight processing

Manage all transport details relevant for air freight, such as airport and heliport information in one place. Apart from transport planning, the software also offers the possibility to communicate directly with the commissioned airlines.

Air freight management

- Automatic splitting at airports
- Handling of international air freight transports

Document management

- Entry of ETC, ETD, shipper, consignee, net rates, TACT rates
- Print of all relevant documents with available order data
- Stock management for AWB numbers
- Import functionality for IATA codes

Interfaces and integration

- Connection to air freight platforms
- Interfaces to DESCARTES, freight offices, customs and compliance checks

Compliance and security

- Security screening (incl. compliance)
- Secure supply-chain handling

Price calculation and contract conditions

- NET and TACT rate calculation
- Inclusion of the Incoterms (terms for delivery and payment conditions)

Container management

- Container registration via interface
- Integration of the different container types
- Planning including container depots
- Integration of container master data
- Worldwide container tracking and status including temperature monitoring
- Evaluation and feedback for container registration

Customs management

- Entry of all relevant customs data
- Data exchange with customs systems
- Return of customs costs
- Connection to external customs providers if required
- Individual masks per customs registration (NCTS, T1,)
- Application of the order/tour data

Benefit from a fleet management that increases the profitability of your company

Simplify the management of your fleet, optimally control your fleet and save time and costs with CarLo® inMOTION.

Overview

- Damage entry and management: transparent and comprehensible damage history thanks to complete documentation
- Data exchange with external financial accounting systems
- Calculation of the contribution margin per tour/type of use
- Automatic import of fuel-card and toll calculations
- Management of all important fleet appointments such as general vehicle inspections, workshop visits, etc.
- Time- or performance-controlled reminder function for upcoming appointments
- Appointment blocker in planning if vehicles and people are booked
- Central document filing of all vehicle documents such as driver's licence or vehicle registration

Ideal fleet management

- Management for all resources available in the fleet
- Management of vehicle appointments and permits
- Automated driver's licence control
- Documentation and processing of accidents and damages

Simple vehicle cost calculation

- Creation of continuous, cost centre-based vehicle cost calculations
- Management of repairs, vehicle washing and vignettes
- Automatic import of fuelling data
- Cost comparison for contribution margin calculation

Comprehensive evaluations

- Evaluation of the fleet in terms of the cost structure
- Identification of outliers and saving potentials
- Clear data visualisation

Cost reduction

- Time saving by process automation
- Minimisation of workshop costs and unexpected expenditures thanks to timely maintenance planning
- Downtime reduction: Efficient planning and preventive maintenance keep the fleet optimally operational

“ The numerous slips of paper that we used to print every day are now history. The TMS CarLo® helped us to combine the entire information in one system.

– Isabel Höfler, Höfler Transport & Logistik GmbH, Ruprechtshofen (Austria)

“ It was especially important to us that the program adapts itself to US and not vice versa.

– Nadine Franke, Stahl-Express Franke GmbH, Düsseldorf (Germany)

“ What was the most convincing for us was the adaptability down to the individual users. This is something we consider to be unique.

– Marcel Burtscher, WOG Logistics AG, Diepoldsau (Switzerland)

Soloplan Academy

The perfect opportunity for both inexperienced and experienced users to better understand CarLo® and to use it more efficiently

We will get you prepared for your transport management

The Standard seminar is very popular with inexperienced CarLo® users, but is equally well-suited as a brush-up seminar. The entire process chain is covered—from quote and order to planning up to calculation. Additionally, topics such as the program areas Statistics, Loading Unit Management, Master Data and Administration are discussed. We also offer such a Standard seminar for our fleet management software CarLo® inMOTION.

The successful participation in a Standard seminar allows you to take part in the more advanced Expert seminars. In the Expert Advanced seminar, the basic knowledge in all program areas is solidified and further deepened—perfect for administrators and key users. In turn, specialised Academies are available for individual workspaces in CarLo®, which deal in detail with functions and different ways of work in the areas Planning, Calculation and Statistics.

What is waiting for you

Active learning based on practical examples from our experienced training experts

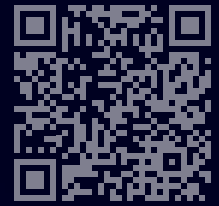

Coordinated seminars in small groups

Detailed training documents and shared exchange of experience

“ First-class modern hotel
with an excellent service culture. Highly recommended!

– Corradino P. (Italy)

When attending a seminar, you can stay directly
in Soloplan City: 4**** business hotel **Soloplan City Resort**

4** business hotel at the branch office in Kempten**

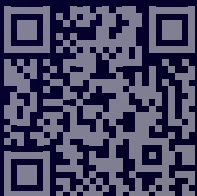

After the breakfast buffet, only 50 metres across
the free car park to get to the training room

Start your training day relaxed and stress-free

For Academy participants at the location in Kempten:
Special prices subject to the available contingent

Seminar registration
and all Academy appointments

“ We also actively make use of the extensive offer
in regard to Academies, webinars and version trainings
in order to get everything out of the program.

– Waldemar Holzhaue, HAWA Freight GmbH, Kehl am Rhein (Germany)

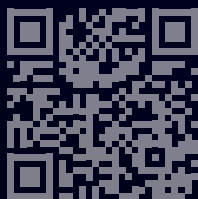

Soloplan Webinars

The digitalisation initiative continues following the great success of the last years

Our free online trainings for even more CarLo® expertise

Receive valuable tips regarding special functions and general advice for the work processes in CarLo®. Additionally, we provide you with insights into technical innovations. We continually adjust the content and topics of our webinars to match your requirements based on our years of experience—this is another reason why the one-hour webinars have already been consistently popular for some years now.

During the two different webinar series, our Soloplan experts from the Sales and Customer Solution Management departments are available to answer your questions. Regardless of whether you are a CarLo® key user, a CarLo® administrator or a potential customer: Our broad selection of topics will certainly include something that is of interest to you. Our qualified employees are always looking forward to questions and input from their listeners—these help us improve even more.
