ATS®
Unique Banding

New: 100% recyclable banding paper

TruePaper

Environmentally friendly, ultrasonically and heat-sealable band

100 %
TruePaper
recyclable

TruePaper is an environmentally friendly, ultrasonic and heat-sealable paper band. TruePaper consists of optionally virgin or more than 50% recycled fibers. It can be recycled in the normal paper cycle and is suitable for direct food contact.

Minimize packaging
Banding with ATS means only as much packaging as necessary. It is often the better alternative to conventional packaging.

100% recyclable
TruePaper consists of at least 95% pure or optionally recycled fibers and can be recycled in the regular paper cycle.

Unique
The sustainable paper band is suitable for all product types and sizes. TruePaper can be sealed with ultrasonic and heatseal technology.

Food safe
Printed ATS bands are grade AA certified to BRCGS Packaging Materials Global Standard. The raw materials comply, among others, with the restrictions of the FDA.
