HOVMAND

LIFT AND MOVE – SAFE AND EASY

INTRODUCING

Inox 130 – now in stainless steel

We have merged the performance of our most popular aluminium lifter with the uncompromising hygiene of stainless steel.

The result is a lifter built for the most demanding environments – **from food production to pharmaceutical cleanrooms** without compromise on performance, safety or hygiene.

The new Inox 130

Quick facts

- ✓ **Hygienic design** – 100% stainless steel, electropolished and resistant to aggressive detergents
- ✓ **Safe operation** – overload protection, safety clutch and soft start
- ✓ **Flexible tools** – wide range of stainless steel tools available
- ✓ **Made for tough environments** – ideal for food production and pharmaceutical cleanrooms
- ✓ **Modular configuration** – customise the lifter with various mast, leg, and tool combinations – including stainless steel tools, antistatic version, swappable battery systems, and gripping/rotating QC3 tools, among others.

Technical specifications

Lifting capacity: up to 130 kg

Lifting height: 1489-1891 mm (might go higher depending on the tool and its position)

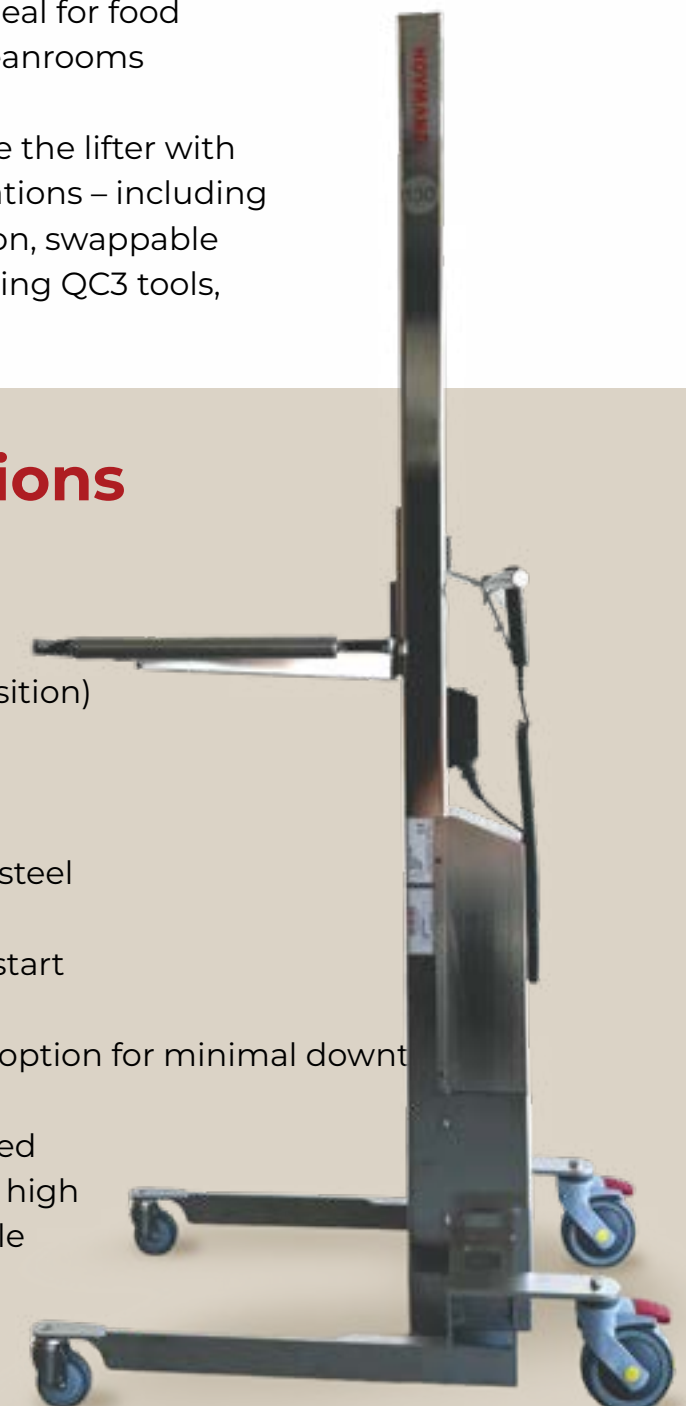

Stroke: 1,245–1,651 mm

Material: 100% electropolished stainless steel

Lifting speed: 62,5 – 125 mm/s with soft start

Battery: 24 V / 9 Ah (swappable battery option for minimal downtime)

IP66-rated & GMP-compliant: Engineered for strict hygiene environments, offering high resistance to water and dust ingress while meeting Good Manufacturing Practice (GMP) standards.
